PROFESSIONAL SUMMARY

Smart India Hackathon-winning IT student and passionate Data Analyst with a proven track record of bridging academic theory with real-world application. Combines hands-on expertise in Python, advanced SQL, and Power BI to engineer scalable ETL pipelines and translate complex datasets into actionable business intelligence. Dedicated to leveraging modern data tools and AI to solve complex problems and drive impact in dynamic sectors like financial technology.

TECHNICAL SKILLS

Programming	Python, JavaScript / TypeScript
Data Analytics	Advanced SQL, Power BI, Tableau, Data Visualization, MS Excel (VLOOKUP, Pivot Tables)
Cloud & Infra	AWS, Docker, Linux, RESTful APIs, Microservices, Firebase, Socket.io
Databases	PostgreSQL, MongoDB, Firestore
Tools	Git / GitHub, JWT Authentication, ChatGPT, Microsoft Copilot, SEO

EXPERIENCE & INTERSHIPS

Data Analyst Intern <i>Bluestack Fintech, Pune</i>	<i>May 2026 – Present</i>
- Automated ETL pipelines using Python, SQL, and APIs to process 87,000+ financial data records. - Performed advanced mutual fund analytics using risk and performance metrics across 4.5 years of market data. - Created interactive Power BI dashboards and executive reports for data-driven investment analysis. - Applied Git/GitHub, modular coding practices, and workflow automation to build scalable analytics solutions.	
Data Analyst Intern <i>TechLiebe, Pune</i>	<i>Nov 2025 – Feb 2026</i>
- Analyzed and managed data using Advanced MS Excel, including VLOOKUP and Pivot Tables. - Built interactive Power BI dashboards and reports to visualize key business insights. - Gained hands-on experience in Business Intelligence, reporting, and data visualization. - Leveraged ChatGPT and Microsoft Copilot to enhance research, productivity, and workflow efficiency.	
Web Developer Intern <i>Mildly Offensive, Delhi</i>	<i>Apr 2025 – Jul 2025</i>
- Developed and maintained responsive, cross-platform company websites. - Optimized website performance, speed, and scalability. - Debugged and resolved technical issues to ensure smooth functionality. - Implemented SEO best practices and ensured accessibility compliance.	
Social Media & Marketing Intern <i>Creaovate (AI-Driven Company), Mumbai</i>	<i>May 2025 – Jul 2025</i>
- Executed trend-based campaigns to boost engagement and follower growth. - Led cold mailing efforts to drive leads and partnerships. - Analyzed campaign performance and optimized strategies using data-driven methods. - Created AI and tech-aligned marketing assets in collaboration with the design team.	
Logistics Head <i>Shutterbugs – Photography & Videography Club, KJSSE</i>	<i>May 2024 – Jul 2025</i>
- Led logistical planning and cross-team communication for the official college photography club. - Oversaw event coverage budgets and directed end-to-end operational execution. - Coordinated logistics for major college events with zero operational delays or conflicts.	

PROJECTS

NexGenClass – Educational Analytics Platform — <i>React, Node.js, MongoDB, Socket.io, Tailwind CSS</i>
- Developed a full-stack educational platform with role-based access control for teachers and students. - Built an early-warning analytics dashboard to visualize attendance trends and quiz performance for at-risk student identification.

- Created an interactive quiz system with automated grading and Socket.io for real-time multi-tab synchronization.
- Designed a glassmorphism-inspired responsive UI with drag-and-drop Kanban task manager and Framer Motion animations.

Smart Traffic Management System — *React, Tailwind CSS, FastAPI, Python, Q-Learning, Recharts*

- Developed an AI-powered traffic management dashboard to simulate vehicle congestion and dynamic signal optimization.
- Implemented a mock Reinforcement Learning (Q-learning) agent to adapt traffic light cycles with real-time comparisons to baselines.
- Built a responsive frontend with real-time intersection animations, control panels, and simulation speed toggles.
- Engineered a live analytics suite using Recharts to track KPIs including wait times, lane queues, and vehicle throughput.

DU Seva – CUET Mock Test Platform — *Next.js, TypeScript, Tailwind CSS, Firebase, Razorpay, Framer Motion*

- Developed a full-stack responsive mock test application simulating the CUET environment for enhanced student preparation.
- Engineered a secure backend with Firebase authentication, Firestore data storage, and Razorpay payment integration.
- Built an admin dashboard for managing student records and mock test creation with bulk CSV import via PapaParse.
- Designed a glassmorphic UI with Framer Motion animations and KaTeX/React Markdown for rendering mathematical equations.

EDUCATION

B.Tech in Information Technology | *K.J. Somaiya College of Engineering, Mumbai*

Aug 2023 – Present

CERTIFICATIONS

SQL for Data Analytics | *Internshala Trainings*

Jun 2024 – Jul 2024

- Completed a 6-week intensive program on data retrieval, manipulation, and advanced SQL querying.

Machine Learning | *Internshala Trainings*

Apr 2024 – Jun 2024

- Completed a 6-week virtual program covering Python basics, data exploration, pre-processing, and linear regression.

Tableau TNX | *Teachnook Virtual*

Nov 2023 – Dec 2023

- Developed proficiency in interactive dashboards, data visualization, and business intelligence reporting.

KEY ACHIEVEMENT

Team Lead | VisionCraft – P.I.S.H

National Smart India Hackathon 2025 — 1st Place

- Team Leadership: Led a technical team to secure 1st Place at the National Smart India Hackathon, delivering an enterprise-grade phishing detection ecosystem.
- AI Threat Detection: Engineered a hybrid AI pipeline (DistilBERT, GNNs, EfficientNet-B0) for real-time multi-vector threat classification.
- Backend Architecture: Architected a low-latency database infrastructure enabling real-time, client-side threat detection.
- Frontend & Integrations: Built a React/Tailwind CSS frontend and integrated the VirusTotal API for automated threat flagging.
- Documentation & Pitching: Authored comprehensive project documentation and presented scalable defense mechanisms at the national level.
- Dynamic Training: Developed an AI-driven system to generate personalized phishing simulations based on user vulnerability profiles.
